The status of the claims is as follows:

Claims 3, 12-14, and 16-27 have been cancelled; and

Claims 1, 2, 4-11, 15, and 28-29.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 7-11, 15, and 28-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Allen(5,899,303). As shown in Figures 10A, 10B or 12A, and 12B, Allen discloses a first door panel (108a) which translates along a tilted track between open and closed positions, a first seal (126, each surface of the seal which extends from a “mounting surface” (108a, 108b) of the door is orthogonal thereto, this includes a top, bottom, and two side surfaces) attached between an attachment end and a distal end, and a second seal (124, the corner end of the seal forms an L-shape along two surfaces) attached between a second attachment end and a distal end and having the same cross-sectional shape (both rectangular), wherein upon closing of the door panel (108a) the seals provide a compression with respect to each other to seal a gap between a closure and an opening (Figure shown in previous office actions).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3634

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-6 are further rejected under 35 U.S.C. 103(a) as being unpatentable over Allen ('303) in view of Clark (2,878,532). All of the elements of the instant invention are discussed in detail above except providing an actuation system for driving the door panel between an open and closed position. Clark ('532) discloses an actuation system, which drives a door panel laterally between an opened and closed position. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide a the door assembly of Allen ('303) with an actuation system as taught by Clark ('532) since an actuation system allows the doors to be automatically opened and closed.

The applicant's arguments have been considered but are not deemed persuasive. As recited in *Webster's Ninth New Collegiate Dictionary*, copyright 1986, **orthogonal** is defined as intersecting or lying at right angles; having perpendicular slopes or tangents at the point of intersection. Therefore, as discussed in detail above, Allen ('303) discloses having a plurality of sealing surfaces in which they are "orthogonal" to and defined by the plane of the surface of the door panel.

Although the Examiner currently has no proposed language, which would put the application in condition for allowance, the Examiner would be more than happy to work with the applicant to move the application forward.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jerry Redman whose telephone number is 571-272-6835. The examiner can normally be reached on M-TH from 8 to 6.
